Summary

Full Stack Developer with 740+ hours of software engineering training and hands-on experience building and deploying end-to-end web applications using React, Node.js, Express, and MongoDB. Developed production-ready projects including an AI-powered job application assistant, a weather-based recommendation platform, and a pet discovery application. Brings 4+ years of logistics and operations experience, combining technical problem-solving with strong process optimization and user-focused thinking.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React, Vite, React Router, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication

Tools: Git, GitHub, Postman, Render, ESLint, Prettier, OpenAI API

Other: Figma, Agile Workflow, Responsive Design

Technical Projects

AppBuddy Copilot | **Tech Stack:** *React, Node.js, Express, MongoDB, OpenAI API, JWT*

- Built a full-stack AI-powered career application platform enabling users to generate tailored cover letters, application responses, and job-specific career insights.
- Implemented secure JWT authentication, profile management, resume parsing, draft autosave, and application tracking workflows.
- Integrated OpenAI APIs to automate content generation and perform skill-gap analysis against job descriptions

Weather & Wardrobe | **Tech Stack:** *React, Node.js, Express, MongoDB*

- Developed a full-stack clothing recommendation platform that generates outfit suggestions based on real-time weather conditions.
- Implemented user authentication, profile management, CRUD item operations, and protected API routes.
- Built responsive interfaces and centralized error handling to improve usability and application stability.

Perfect Pet Finder | **Tech Stack:** *React, Vite, Web Components*

- Built a pet discovery platform allowing users to browse, save, and manage adoptable pets through third-party integrations.
- Refactored application architecture following API deprecation by implementing a Web Component-based data source.
- Added persistent Saved Pets functionality using localStorage and responsive UI components.

Experiences

Lead Associate — *Cardinal Health, Bethlehem, PA (September 2022 – Present)*

- Coordinated daily logistics operations supporting delivery and inventory workflows in a fast-paced healthcare environment.
- Utilized digital tracking and inventory management systems to monitor shipments and maintain operational accuracy.
- Resolved delivery exceptions and workflow issues while collaborating across warehouse and transportation teams.
- Maintained compliance with safety, quality, and operational standards in a high-volume distribution environment.

Education

TripleTen | Software Engineering Certificate (Full Stack) | 2025

- Completed 740+ hours of software engineering training.
- Built and deployed multiple full-stack applications using React, Node.js, Express, MongoDB, and REST APIs.
- Developed experience with Git workflows, authentication, database design, and responsive frontend development.
